

## Dave Williams

Dave Williams currently serves as the Lead Architect for the USDA Enterprise Messaging Project. Mr. Williams also serves as the Security Architect for ITS in the Architecture Definition Branch within OCIO/ITS. Mr. Williams is responsible for the on-going design work on the USDA enterprise messaging project. The final design, which will provide a robust messaging and collaboration system designed to support the USDA user community, will serve as a foundation to communications as the department works forward.

Mr. Williams is a career federal employee joining USDA/Agriculture Research Service in September 1999.

Mr. Williams grew up in the western United States, primarily in Oregon and California. He currently resides in Ft. Collins, CO. He has five children, ages 12 to 26. He holds a number of professional certifications in security and networking. He is a product of the US Navy nuclear power program and has pursued his education since in an unconventional way.
