

Biographical Sketch

Kourtney Peters, IT-Specialist

Kourtney Peters currently serves as an IT-Specialist in the Data Warehouse Branch of the ACFO-FSPM's Corporate Mixed Systems Division. Kourtney is responsible for developing and testing code for the FDW's Extract, Transform and Load (ETL) process, maintaining the current FDW website and current Brio reports, assisting in Hyperion conversion, assisting in the data extraction process for FMMI, and trouble-shooting daily production issues relating to the FDW. Kourtney's federal career began with the USDA's National Finance Center in 1996 as a program analyst on the FFIS project. Kourtney has thirteen years of federal service performing code development, quality assurance testing, and drafting technical documentation. Kourtney holds a bachelor's degree in Graphic Design from the University of Mississippi.
